Reasons for this report

✓ Our analysis of the most recent weekly US lodging results

July 3, 2024

Lodging: US RevPAR +6.9% y/y last week. Big group week in between the Juneteenth and July 4th holidays (as expected)

Overall U.S. RevPAR was +6.9% y/y for the week ending 6/29/2024, per STR, above the prior week's result of -2.3% y/y and above the trailing 10-week average of +1.9%.

As we expected, last week was positively impacted by strong business travel (Group RevPAR: +26% y/y) as last week was in between two holiday-impacted weeks (Juneteenth the week prior and July 4th this week). Adding to the calendar shift impact is the timing of both holidays being in the middle of the workweek. We anticipate sharply reduced business travel in next week's data set, a net headwind given group is the strongest travel segment today (and leisure is the weakest).

As a rule of thumb when analyzing the weekly data, if Group results are abnormally strong or weak, which they were last week, there is a holiday shift going on.

Major RevPAR statistics presented below:

- Luxury RevPAR: +9.8% y/y
- Upper Upscale RevPAR: +9.9% y/y
- Upscale RevPAR: +8.2% y/y
- Upper Midscale RevPAR: +5.4% y/y
- Midscale RevPAR: +3.0% y/y
- Economy RevPAR: -2.9% y/y
- Independent hotels (~ 1/3rd of the data set) RevPAR: +5.2% y/y; and
- Within Upper Upscale & Luxury class hotels:
 - Group: +26.4% y/y vs. -5.4% prior week;
 - Transient: +3.7% y/y vs. -1.2% prior week;
- Las Vegas RevPAR: +13.2% y/y
- As a caveat, we note that many large Strip casino hotel operators do not participate in STR's survey.

Last week's RevPAR details and sequential trends (all comparable information on new STR methodology):

- Headline RevPAR was +6.9% y/y vs. the running 28-day average of +1.6% y/y.
- Occupancy: Absolute occupancy was 71.9% vs. 70.2% for the running 28-day average.
- Absolute Group occupancy: 23.7% last week vs. 22.9% for the running 28 days.

The Lodging stocks:

• Of the lodging stocks our favorite name is Wyndham (WH, Buy). WH has underperformed the hotel C-corps since the initial news about the proposed merger with Choice Hotels (CHH, Hold) last spring. While the proposed merger has ended and investors can once again value WH as a standalone entity going forward, we view WH stock as considerably undervalued. We can also point to an 8-K released by WH on 3/11 in advance of CHH's decision to stop the merger pursuit where WH provided "pillars for standalone growth" representative of \$26 stock price upside by the end of 2025 driven by: 1) continuing a 6% plus historical EBITDA growth, 2) expected \$650M of FCF generation over the next two years, and 3) ability to deploy \$400M of additional leverage capacity based on a net leverage target of 3.5x (substantial cash returns to shareholders as has been the case for years). Additionally and distinctly from the \$26 upside, WH also views an additional \$22

upside per share driven by EBITDA growth that is anticipated to be in the 7-10% range and a re-rating on the multiple (1.0x is worth \$10/share in WH's calculation).

• For the hotel REITS, our favorite name is RHP (Buy). At 80% of its business coming from groups/conventions, RHP has the greatest exposure to this customer segment and has no hotels located in the especially tech-heavy San Francisco area. We add that RHP's hotels are likely benefiting from several "self-help" factors including having properties in better condition than some other big box comparables and convention centers as well as what has proven to be a smart strategy of maintaining their property-level salesforce during the heart of the pandemic.

WH: Valuation and Risks

Our price target of \$105 for WH is based on a 15.0x target EV/EBITDA multiple (in line with portfolio quality/RevPAR relative to peers) of our 2025 EBITDA estimate.

Risks to our rating and price target: Slowdown in development opportunities. Macro demand/pipeline headwinds.

RHP: Valuation and Risks

Our price target of \$130 for RHP is derived by applying a 13.0x target EV/EBITDA multiple to our estimate for 2025 lodging EBITDA and a 16.0x multiple to our Opry/attractions estimate. We view the multiple assignments as appropriate for the quality and unique nature of the portfolios (slight premium to REIT peer average of ~12.0-12.5x on Hospitality).

Risks to our rating and price target include: Group demand returns slower than expected. Property-specific risks given a small portfolio.

CHH: Valuation and Risks

Our price target of \$144 for CHH is derived by applying a 14.0x target EV/EBITDA multiple (slightly above industry average and in the midpoint of CHH's historical trading multiple range) to our estimate for 2025 EBITDA.

Risks to our rating and price target include: Upside risks: conservative guidance, if the economy performs better than expected, outperformance by Radisson. Downside risks: slowdown in development opportunities, high construction costs, newly created brands grow slower than expectations, and underperformance by Radisson.

Truist Securities Rating System for Equity Securities

Truist Securities, Inc. ("Truist Securities") rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) - Truist Securities does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that Truist Securities' rating and/or target price have been temporarily suspended due to applicable regulations and/or Truist Securities Management discretion. The previously published rating and target price should not be relied upon.

Truist Securities analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Truist Securities Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.
